## WORK

---

<b>Data Scientist</b>    Google Global Infrastructure	April 2023 –
<ul style="list-style-type: none"><li>Built an ML system that predicts optical failures from device telemetry before they cause outages</li><li>Found correlation in network traffic and used it to cut the capacity build signal by 10%</li><li>Built stability metrics for the capacity planning solver, root-causing instability by comparing solver and router pathing</li><li>Built pipelines and metrics that trace traffic engineering events back to physical layer failures</li><li>Building an early warning system that forecasts fiber infrastructure needs from upstream power signals</li></ul>	
<b>Data Scientist</b>    Twitter	August 2021 – March 2023
<ul style="list-style-type: none"><li>Identified latency bottlenecks in Twitter's serving stack by tracing requests through distributed systems</li><li>Rewrote the spam classifier to use reply timing, cutting false positives on real accounts</li><li>Ran experiments on cluster scheduling to improve utilization</li></ul>	
<b>Data Scientist</b>    Wealthfront	August 2018 – July 2021
<ul style="list-style-type: none"><li>Wrote the optimization engine behind Wealthfront's robo-advisor: a stochastic program solved with Benders decomposition</li><li>Built an order matching system that netted client trades internally before sending them to market</li></ul>	
<b>Research Fellow</b>    University of Cambridge	2017 – 2018
<ul style="list-style-type: none"><li>Research in information economics</li></ul>	

## EDUCATION

---

<b>Ph.D., Economics</b> ,  Harvard University	2017
<i>Mechanism Design. Committee: Eric Maskin (Chair), Oliver Hart</i>	
<b>B.Sc. Mathematics / B.Econ.</b> ,  University of Queensland, Australia	2009
<i>First Class Honours, University Medal</i>	

## PROJECTS

---

- Communication Systems from Scratch:** BGP, TCP/IP, Audio Modem, QUIC, BBR, Protocol Buffers, HTTP/3, and gRPC
- Financial Planning in the AI Era:** An AI financial advisor built from bank statements and a single prompt document
- Algorithmic Mechanism Design:** Probabilistic Serial and Constrained Birkhoff-von Neumann algorithms for fair allocation

## RESEARCH

---

*Contracts for Acquiring Information.* Clark, A. and Reggiani, G. arXiv:2103.03911, 2017

*Capacity Constraints in Principal-Agent Problems.* Clark, A. arXiv:2412.01760, 2017

*Core Equivalence with Large Agents.* Clark, A. arXiv:2103.05136, 2017

## SKILLS

---

Machine learning · Optimization · Infrastructure · Mechanism design · Operations research

Day-to-day: Python, SQL, Shell · Infrequent: C++, Rust, Scala, R, Julia
